DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Admitted Prior Art (AAPA) in view of Adams (3,566,207). AAPA teach physically stabilizing, by a placement device (figure 2c, item 220), a hard drive head device for electrical bonding of said head device to a hard drive arm component and utilizing (figure 2b, item 202 and 206), by said placement device (figure 2c, item 220) wherein said hard drive head device is a hard disk drive magnetic head (figure 2b, item 202); wherein said hard drive arm component is a suspension tongue (figure 2c, item 212); wherein physically stabilizing by the placement device the hard drive arm component (figure 2c, item 220, 206, and 211) wherein said electrical bonding is ball bonding (figure 2b, item 204); wherein said electrical bonding is a type selected from the group consisting of gold ball bonding (GBB), solder bump bonding (SBB), ultrasonic welding, and stitch bonding (figure 2b, item 204); providing an alignment pin protruding from said placement device (figure 5, item 62); where the alignment pin is capable of being inserted into a suspension tooling hole for ensuring said proper alignment (Figure 5, item 62). Adams teach sub-ambient pressure to maintain the position for said electrical bonding (figure 1, item 62). It would have been obvious to one of ordinary skill in the art at the time of the invention to

modify the method of AAPA to utilize the vacuum head in order to ensure the proper placement of the workpiece (see Adams col. 3, ll. 50-75).

Allowable Subject Matter

Claims 24-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is an examiner's statement of reasons for allowance: The prior art of record does not suggest or teach a method of manufacturing a data storage device, particularly the first and second vacuum tube structure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., the placement device directly contacts the hard drive arm component) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). In the instant case, AAPA teaches the placement device (220), in combination with the

base support (211), indirectly stabilizes the hard drive arm component (206). The rejection is maintained despite applicant's traversal.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
